

10th International Workshop on Resistance to Thyroid Hormone & Thyroid Hormone Action

Manoir Saint Castin, Quebec, Canada

September 17-19, 2012, just preceding the 82 annual meeting of ATA

<http://rthworkshop.uchicago.edu>

The RTH Workshop provides a forum for presentation of work-in-progress and extended vigorous discussion of ideas to stimulate further advances in the understanding and treatment of Resistance to Thyroid Hormone (RTH) and other genetic forms of reduced sensitivity to thyroid hormone.

The Workshop provides a forum for presentation of work-in-progress and extended vigorous discussion to stimulate further advances in the understanding and treatment of syndromes or reduced sensitivity to thyroid hormone.

Topics will include: Genomic and non-genomic TH action. Basic understanding of TH receptors α and β , MCT8, SBP2, their defects in humans and in animal models as well as treatment options
