Surgery of the Thyroid and Parathyroid Glands

Dear Colleague,

We invite you to join over 35 national and international experts at Harvard for an in-depth 2 1/2-day meeting featuring surgical, medical-endocrine, radiology and pathology State of the Art lectures with expert panel sessions.

Surgery of the Thyroid and Parathyroid Glands is intended to be a comprehensive review and update of surgery of the thyroid and parathyroid glands by a world class renowned faculty. The course was founded in 1996 has received critical acclaim worldwide.

- This course will cover the most recent and relevant data regarding:
 - Pre-op diagnosis and staging including **voice and laryngeal exam updates**
 - Pre-op **FNA molecular analysis**
 - Surgical anatomy and technique with avoidance and management of complications including **neural monitoring and treatment of vocal cord paralysis and approach to management of nodal disease**
 - Comprehensive review of postop **medical adjuvant therapies**
 - State of the Art lecture on the “**Genomic Landscape of Thyroid Malignancy**” by a renown endocrine genomic scientist
 - Recent advances in the management of routine and advanced thyroid malignancies including **observational studies of low grade papillary cancers** as well as **ATA recommended multimodal treatment of Anaplastic carcinoma**
 - **Complex parathyroid surgery**

We hope you will join us. Please save the date. Registration will be available approximately April 2014
